

Camelia

The Camelia, a 2-story home that will fit into an established neighborhood or on acreage in the country. With the semi-private foyer, and an expansive living and dining area large enough for a full-size family. You can customize your design by adding windows or sliding glass doors (see print) in many areas.

You'll have plenty of room for cooking or entertaining in the large kitchen. We've added a downstairs half bath and a side door which can provide easy access from a site-built carport or garage. Upstairs you have a large master bedroom and bath with storage under the stairs. Two additional bedrooms and a bath gives young families room to grow.

This plan has pre-approved engineering for Florida, Georgia, Mississippi, and Alabama giving you an immediate savings on the engineering fees. Ask your builder about this.

The square footage and other dimensions on our floor plans are approximate. Renderings are not intended to be an accurate representation of the home and are often shown with optional features and/or third-party additions that can be added at additional cost if available in your region or situation.
