

Redfish

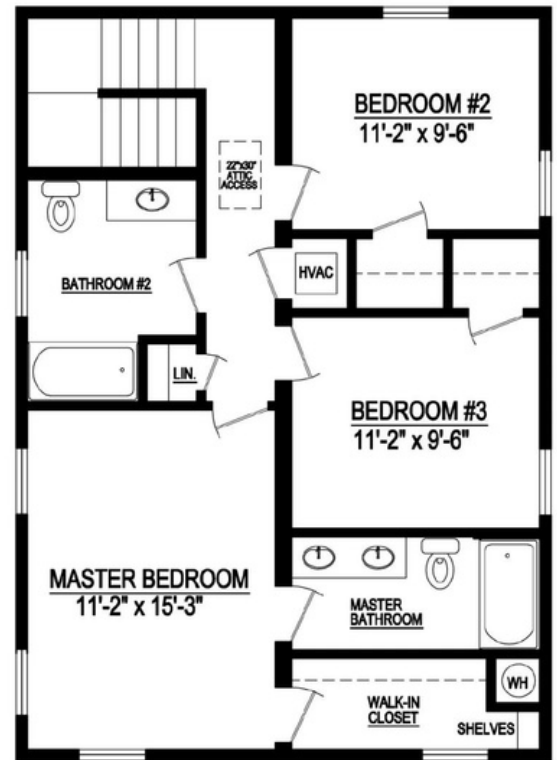

The Red Fish is a home design combining the kitchen and adjacent living areas into a single, large gathering space where family members and guests can interact during the entire course of a visit, not just during the sit-down meal. The home is efficient in its design, with 3 bedrooms and 2 complete baths upstairs and a half bath and ground floor utility room downstairs. The large covered porch gives friends and family another place to relax outdoors. The small footprint makes this two story an economical choice for small lots.

The square footage and other dimensions on our floor plans are approximate. Renderings are not intended to be an accurate representation of the home and are often shown with optional features and/or third-party additions that can be added at additional cost if available in your region or situation.
